Introduction:

Welcome to 'Saudi Adventures,' your gateway to exploring the rich culture, history, and natural beauty of Saudi Arabia. This app is your guide to unforgettable experiences, for camping and hiking in the heart of the Saudi Arabia.

Problem:

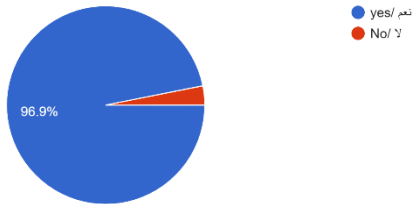

The 'Saudi Adventures' app aims to address the challenge of providing tourists and travelers and even local people with a comprehensive, user-friendly, and informative platform for discovering, planning, and experiencing the diverse attractions, activities, and cultural heritage of Saudi Arabia. This includes overcoming obstacles such as limited accessibility to relevant information, language barriers, and the need for personalized travel recommendations. The app intends to make exploring Saudi Arabia an exciting and hassle-free adventure for visitors from around the world.

Solution:

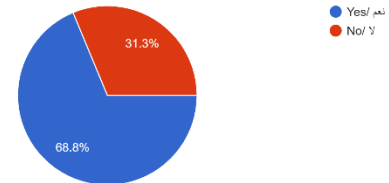

The “Saudi Adventures” application will collect many wonderful adventures around many regions of the Kingdom of Saudi Arabia to make it easy for the user to see and book through the application. All information related to the adventure will also be displayed, and reservation information will be displayed

Questioner:

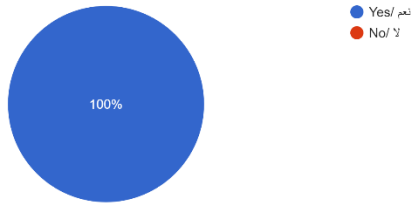

هل انت من جبي المغامرات؟ Do you like to do adventures?
32 responses

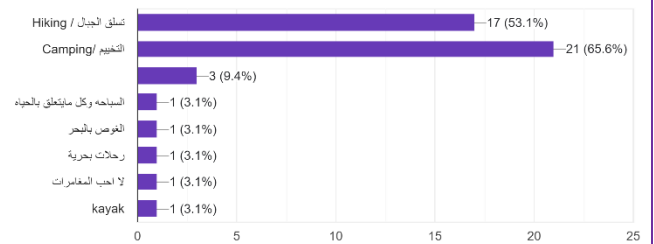

هل تواجه صعوبة في حجز مغامرات في السعودية؟ Are you having difficulty booking adventures in Saudi Arabia?
32 responses

Questioner result:

The survey results indicate that a majority of individuals have a strong affinity for adventure and face challenges when it comes to making reservations for adventure activities in Saudi Arabia. Furthermore, 100% of the respondents agreed that having an application to assist with reservations would be beneficial. Hiking and camping emerged as the most favored adventure activities among the participants. Additionally, participants expressed the belief that making reservations in Saudi Arabia is a common practice, and they particularly appreciated the idea of receiving reminders through our app. Lastly, the preferred destination among the respondents was Alula.

Requirements

Functional:

User Authentication: The system should allow users to create accounts, log in, and reset their passwords.

Booking System: The application must enable users to book camps and hikes.

Payment: Users should be able to choose payment method during the checkout process. The application should provide a user-friendly interface to select and switch between different payment options.

View details: The application should display all the reservation details.

Remainder: The application should send timely reminders to users regarding their upcoming adventure.

Non-Functional:

Performance: The system should respond to user actions within two seconds, even under heavy load.

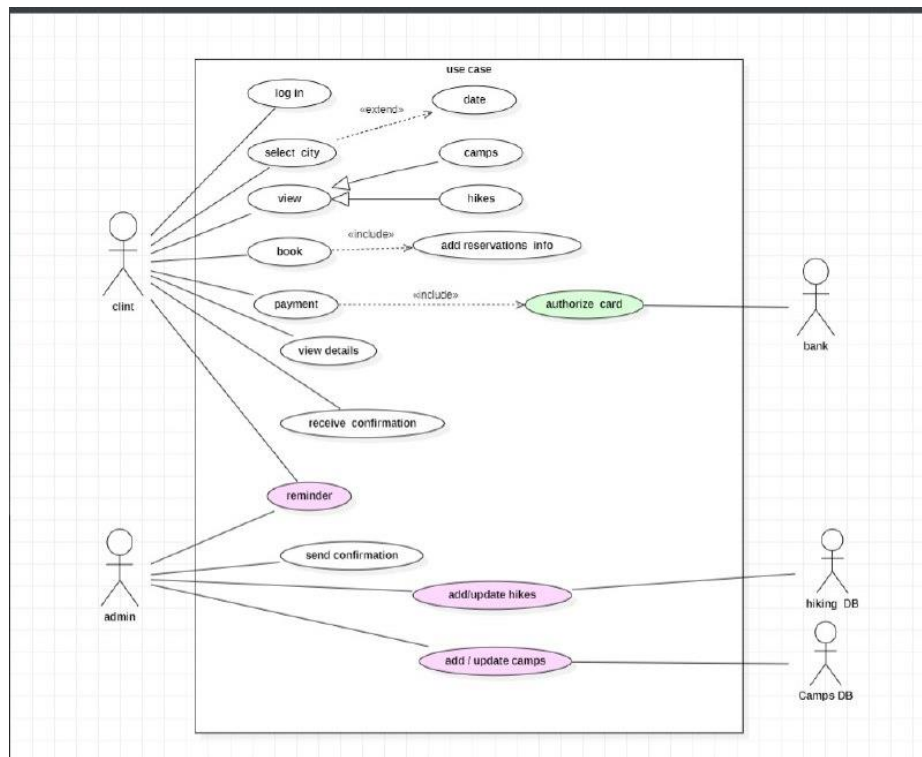

Security: User data must be encrypted, and the system should follow industry best practices for data protection.

Availability: The system should be available 99.99% of the time (less than 5 minutes of downtime per year).

Scalability: The application should be able to handle a 50% increase in user traffic without performance degradation.

Usability: The user interface should follow established usability guidelines and be tested for user satisfaction.

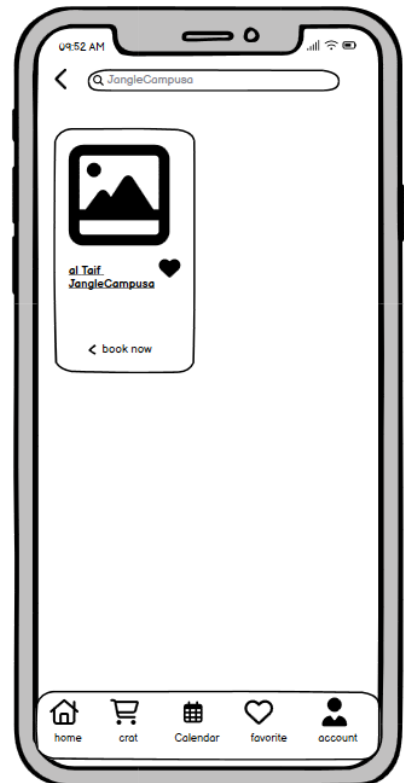

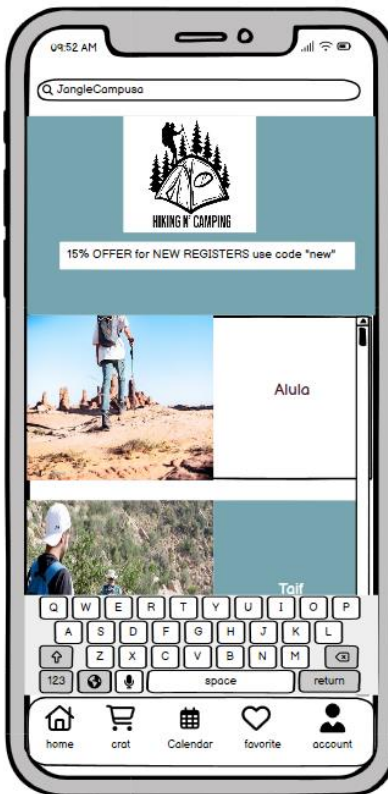

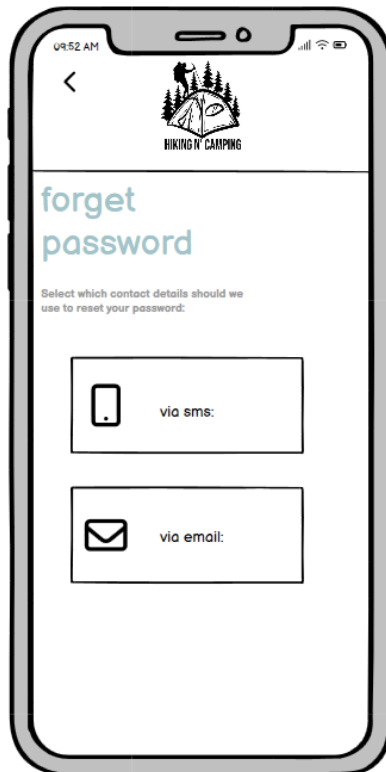

Use case:

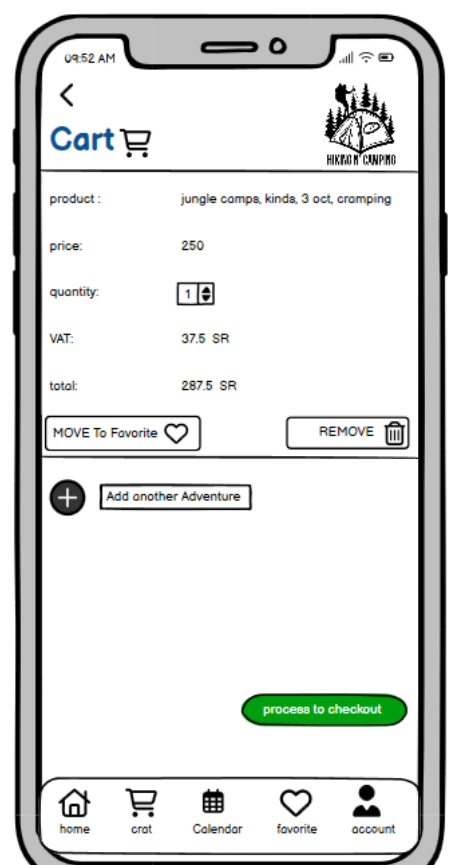

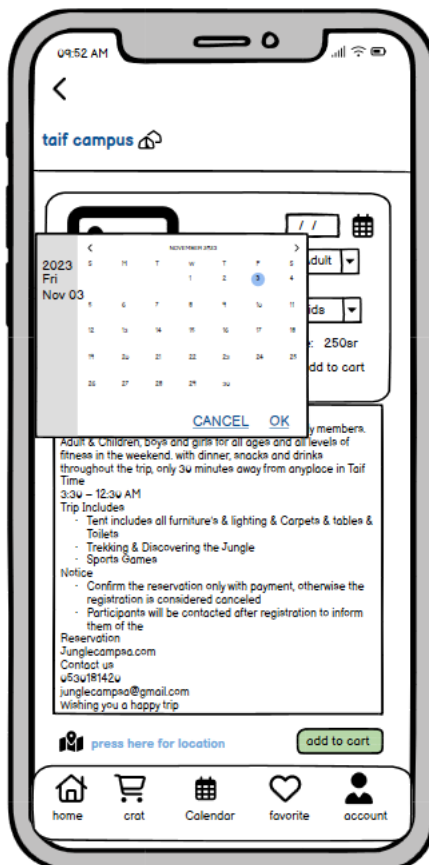

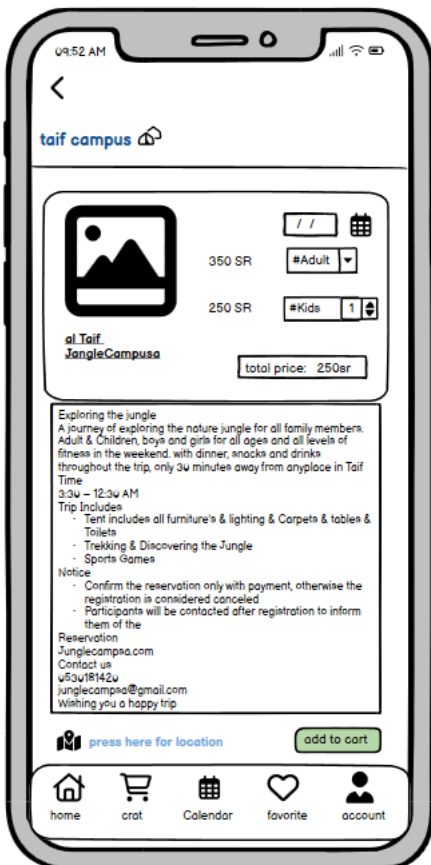

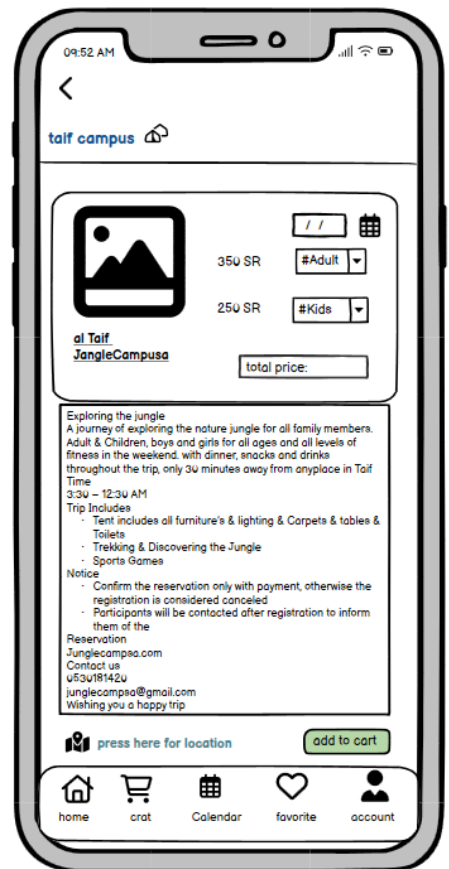

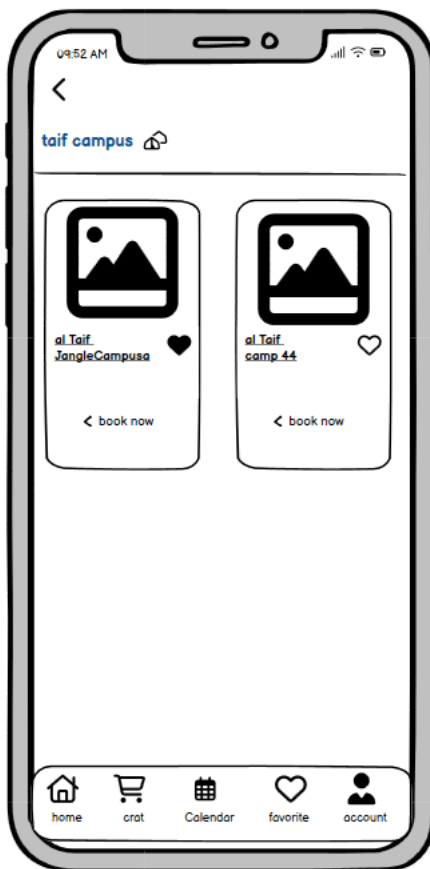

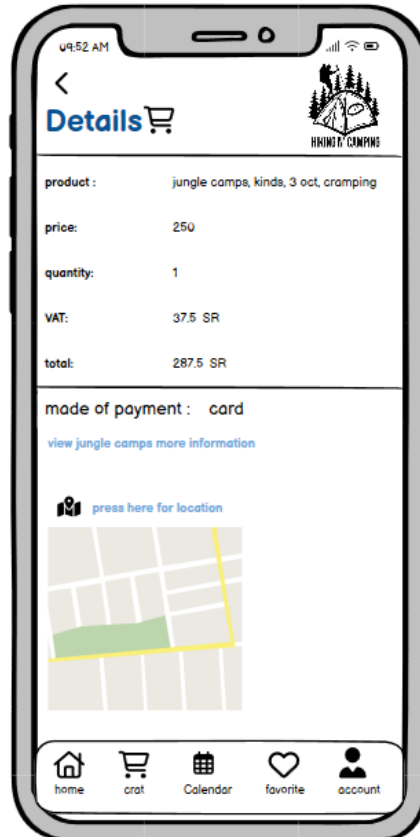

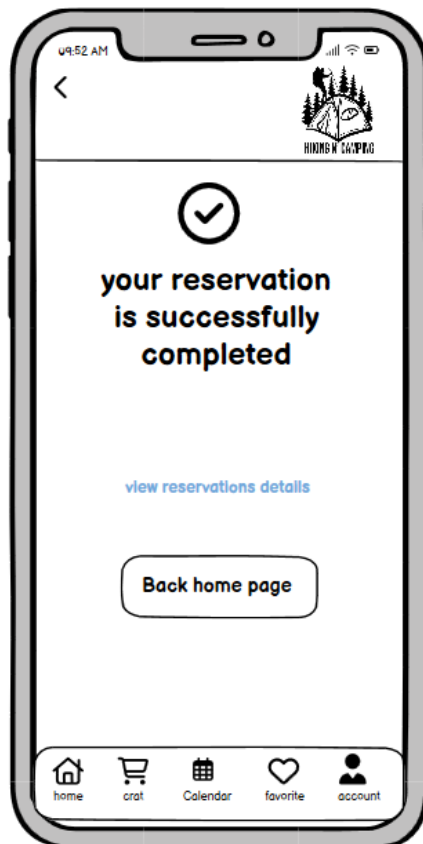

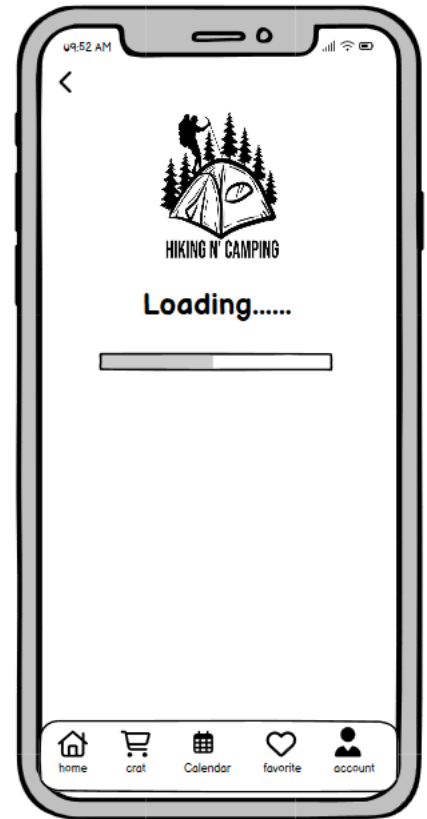

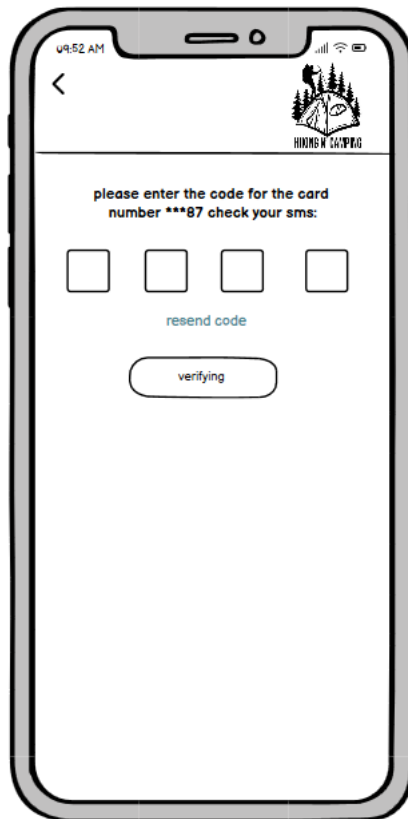

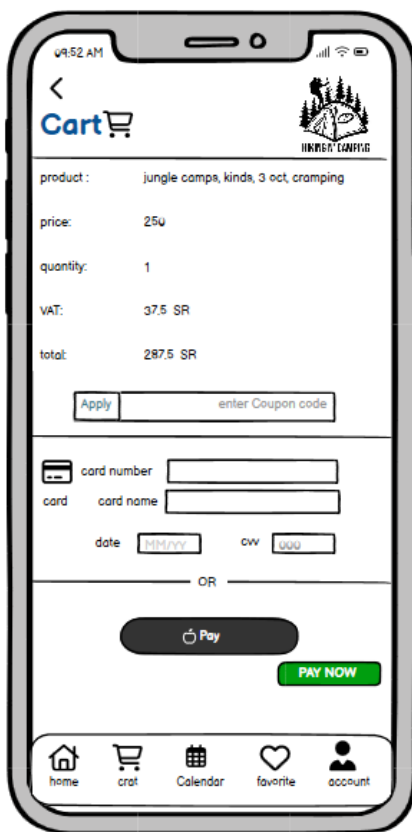

Scenario:

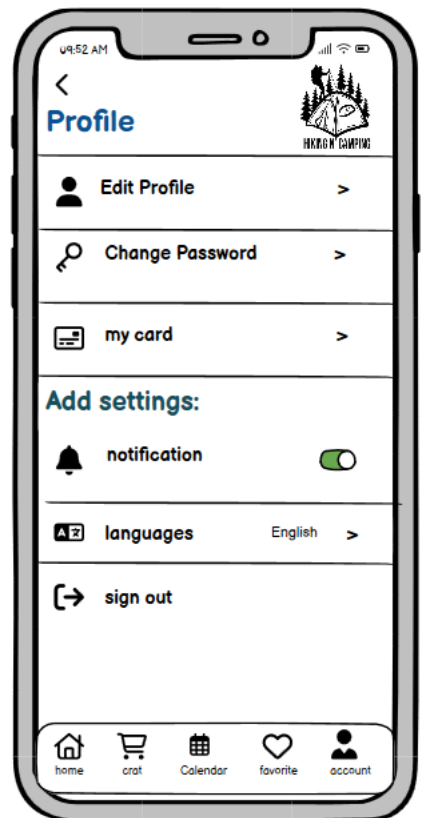

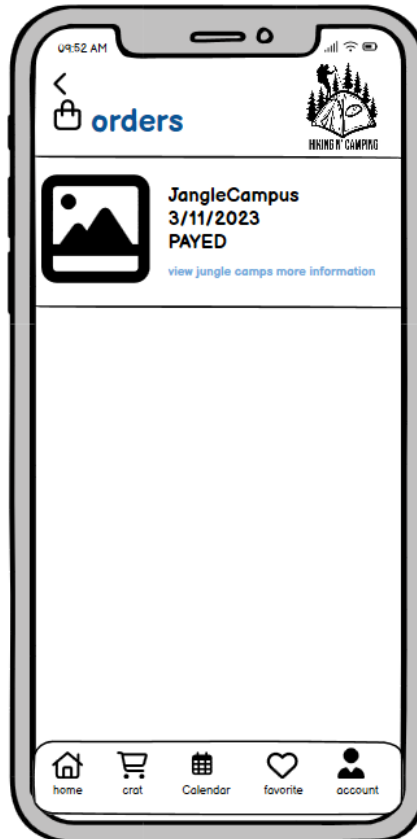

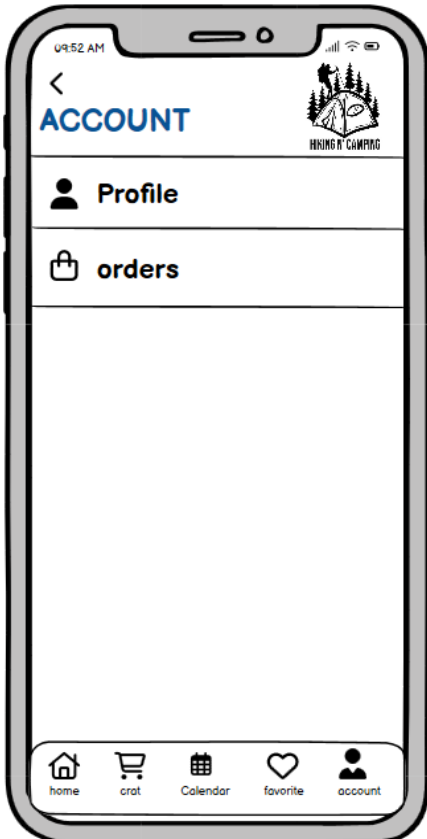

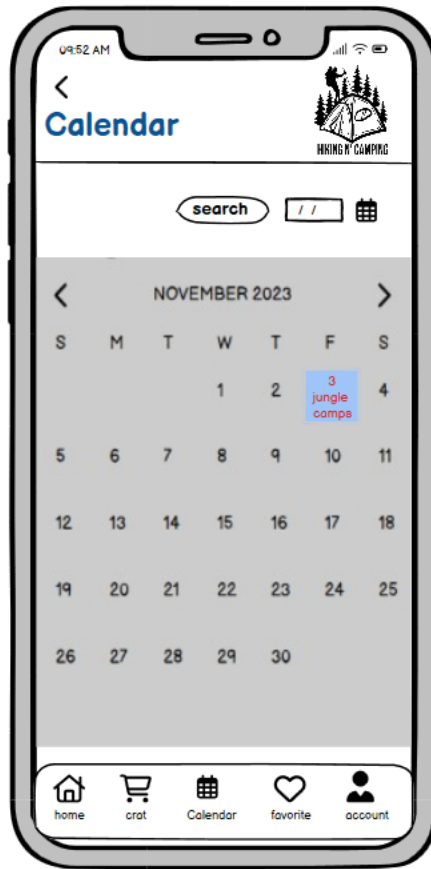

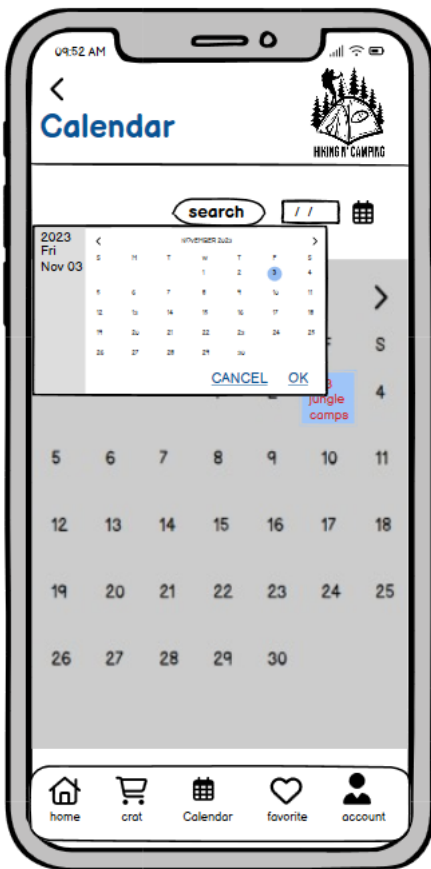

1. Users will have the option to register an account or log in if they already have one. The registration process may involve providing personal details like name, contact information, and preferred payment methods. User authentication ensures secure access to the booking features.
2. Once logged in, users can search for their desired destination and date.
3. The application will offer to the user to choose adventures (camps, hikes).
4. The application allows users to book an adventure then add the reservation information.
5. The application should securely handle payment transactions using trusted payment gateways. Users can choose their preferred payment method. The application should provide confirmation of successful transactions and generate electronic tickets or booking references. By interacting with bank.
6. After successful payment, the application should display a booking confirmation page with all the relevant details.
7. The admin will create a reminder to the user.
8. After that the admin will send a confirmation to the user.
9. The application will interact with hikes database and camps database for updating / adding.

Usability testing:

1. Time to learn: the possible time for each trainer to understand the application is (5-8 minutes).
2. Speed of performance & Rate of errors:

TASK	Trainer name	Duration	Completion	Number of errors (type)	Rate of error per task
Log in	Nora	00:19	Yes	0	33.3%
	Salma	00:49	Yes	sign up nested of login	
	Osama	00:11	Yes	0	
Change language	Nora	00:08	Yes	0	0%
	Salma	00:10	Yes	0	
	Osama	00:09	Yes	0	
Make a reservation	Nora	00:25	Yes	0	0%
	Salma	01:18	Yes	0	
	Osama	00:34	Yes	0	
View order details	Nora	00:23	Yes	0	0%
	Salma	00:11	Yes	0	
	Osama	00:18	Yes	0	
Update profile	Nora	00:21	Yes	0	0%
	Salma	00:18	Yes	0	
	Osama	00:17	Yes	0	
Go to calendar	Nora	00:03	Yes	0	0%
	Salma	00:04	Yes	0	
	Osama	00:06	Yes	0	

3. Subjective satisfaction:

- First trainer: 100%
- Second trainer: 96%
- Last trainer: 100 %

According to all trainers, they like the application for its simplicity, clarity, and user-friendliness. However, we believe that they also enjoy the style and colors of the application.

Challenges:

- We faced some difficulties in creating some interfaces using “Figma”.
- We had to learn how to set new icons (for ex: in adding flags).
- Determining suitable times for the team to work.
- Gathering requirements and identifying the best destinations.

future work:

- We want to add more adventures destinations to visit in Saudi Arabia.
- We also see the possibility of adding a filtering feature to facilitate search operations.
- Adding more languages to the application.
- Gathering a larger number of camps, and hiking.

Conclusion:

We have noticed that many people love camping and hiking, so we thought of creating an application that facilitates finding available places and also allows booking through it.

We have enjoyed this course very much in terms of creativity and user experience.
